INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/KR2004/003179

Box No.	I Basis of the report					
1. With	th regard to the language, this report is based on the international application in the language in which it was filed, unless erwise indicated under this item. This report is based on translations from the original language into the following language					
to the	With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this reort as "originally filed" and are not annexed to this report): the international application as originally filed/furnished					
	the description: pages as originally filed/furnished pages* received by this Authority on pages* received by this Authority on					
	the claims: pages					
	the drawings: pages					
3.	The amendments have resulted in the cancellation of: the description, pages the claims, Nos. the drawings, sheets the sequence listing (specify): any table(s) related to sequence listing (specify):					
4.	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)). the description, pages the claims, Nos the drawings, sheets any table(s) related to sequence listing (specify): any table(s) related to sequence listing (specify):					
* If item 4 applies, some or all of those sheets may be marked "superseded."						

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/KR2004/003179

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	1-5	YES
		Claims		No
	Inventive step (IS)	Claims		YES
		Claims	1-5	NO
	Industrial applicability (IA)	Claims	1-5	YES
		Claims		NO

2. Citations and explanations (Rule 70.7)

The present invention relates a method for the purification of human interferon beta (INF-beta) consisting of effective washing stage in which 40-60% propylene glycol is used.

The following documents have been considered for the purpose of the report:

D1: US 5244655 (Sep 14, 1993) D2: US 4483849 (Nov 20, 1984)

1. Novelty

D1 describes a method for purifying of human INF-beta by RP-HPLC. D2 disclose a process for stabilizing purified human INF using propylene glycol, and the use of Affi-Gel Blue in column of affinity chromatography stage. The select use of 40-60% propylene glycol in washing stage is not disclosed in any of the prior art. Therefore, the subject-matter of claims 1-5 is considered to be novel under PCT Article 33(2).

2. Inventive Step

The present invention especially provides a purifying process of human INF-beta containing washing stage by 40-60% propylene glycol. D1 and D2 disclose the purifying process consisting of special techniques: Affi-Gel Blue in column of affinity chromatography stage, RP-HPLC and propylene glycol. The present invention shows a difference in the select use of propylene glycol in washing stage. However, the present invention claimed in claims 1-5 is considered to be easily invented by a person skilled in the art with knowledge of the prior art documents D1 and D2, without the excercise of inventive skill. Therefore, the subject-matter of claims 1-5 is not considered to involve an inventive step under PCT Article 33(3).

3. Industrial Applicability

The subject-matter of claims 1-5 is considered to be industrially applicable under PCT Article 33(4).
